Hershey

NUT TREE NURSERIES

JOHN W. HERSHEY, *Owner*

DOWNINGTOWN, PA.

This Nursery is the National Headquarters for
Information on Scientific Tree Crop Culture.

Tree Crops increase income by harvesting crops from
unplowable acres. Decreases feed costs on cattle and
poultry raising. Makes game profitable.

"Plant until you're Planted"

The thrilling slogan "America the beautiful" is rapidly changing into "Americans the beautiful suckers." As we go to press the decadence of republican government continues with—the federal administration continuing the communistic flavor of—"we the people" being looked on as weak minded children without quite all our buttons and "we the people" let them continue to decide what's best for us.

But as the cramps of short circuiting increases because of neocratic edicts a will to resist is increasing with it.

From the 1930's attitude, that it was the government's headache to solve our conservation problem we see a slowly turning to "it's our problem." Large land companies are shouldering the burden of reclaiming their land with trees—more and more farmers and home owners are planting a tree for nuts, song birds, cattle feeding and ornamentals. Will you join the parade?

We're tickled to say our inventory is larger for spring shipping than for several years. I'm in a sweat with my farm. Plant it from my short stock and be short of money OR sell the trees and keep waiting to get my orchard planted, YOU can help make up my mind by ordering early. May I hear from you immediately?

When buying crop trees you want the best. The Hershey Way, is SEED, SCION and STRAIN SELECTION, plus soil management that makes for the **most** healthy trees. And last of all trees are wax dipped before shipping. The sum total is a better investment for you.

Conditions do not warrant our printing a new illustrated descriptive catalogue. Will be glad to mail our old one on request. It's interesting.

TREE CROP CULTURE

A pamphlet on planting and cultural care of tree crops. Based on 20 years' intense practical study and experience Don't miss it. **10c.**

*Join the Thriving, Dynamic***PENNA. NUT GROWERS ASSOCIATION
DON'T FORGET**

\$2.00 per year including the Forest Leaves Magazine. This is the only publication in the world on Northern Nut Culture and Tree Crops.

Mail check to John W. Hershey, Secretary.

TERMS

Prices subject to change without notice.

Please read description before writing for more information.

Cash must accompany order except where special terms are arranged or from old customers with good credit.

All prices f.o.b. Downingtown, Pa. Orders up to \$5.00 of small size stock can be mailed—add 10% for postage. We discourage Parcel Post shipment, the losses are terrific and there's no redress.

Express, delivers in half the time—few losses, no squawks on claims.

Our responsibility ceases when shipment has been delivered to the hands of the carrier (or transportation agency).

No order where an affidavit must accompany invoice will be considered for less than \$10.00.

Grafted Black Walnut

Juglans Nigra

The Commercial Tree of the North

The thin-shelled grafted varieties. The commercial nut tree for the north and a good partner for the Pecan in the middle south and southwest.

Thomas, Elmer Myers, Ohio

Bear in 3 to 5 years.

Elmer Meyers and Ohio, not over 2 to a customer.

	Each rate only
2—3 feet.....	\$2.25
3—4 feet.....	2.50

Thomas bearing age—for those wanting a specimen quickly, these, with a little care will fill the bill. By cutting back well and wax dipping them they come out fine. 10% discount on these if called for with no packing.

	Each	Dozen
12—15 feet.....	\$10.00	\$100.00
Same height but extra heavy.....	13.00	130.00

Cut Leaf Black Walnut

Juglans Nigra Laciniata—Keystone Variety

These are extremely beautiful.

	Each

12—18 inch, one year.....	\$.25	\$2.50	\$10.00
2—3 feet.....	.50	5.00	
3—4 feet.....	.75		

The following are dandies for home nuts and lawn. Ornamentals—beat any ordinary shade tree.

English or Persian Walnut

Juglans Regia

Broadview Variety

This is the finest variety yet known to the east. Grafted on Black Walnut.

Bears in 5 to 7 years.

	Each
2—3 feet.....	\$3.00
3—4 feet.....	3.25

Paw Paws

Am pleased to offer seedling at the following prices. Don't have many roots but will grow with care.

	Each	Dozen
12—18 inches.....	\$.50	\$ 5.00
2—3 feet.....	1.00	10.00

Chestnuts (Chinese) *Castanea Mollissima*

Sweet, delicious, Blight resistant.

Bears 3-5 years.

Plant two for pollination.

For years some effort has been made by individuals to select named varieties of this Chinese Chestnut (*castanea mollissima*). However, they come so nearly true from seed, we recommend the planting of seedlings for home and commercial use. A large field awaits the use of the Chestnut when the American people become convinced that they are resistant enough to the blight to make them worth while planting.

Here's some evidence—A man from Elkton, Maryland writes "In my grove of 150, ten year chinese chestnuts many bore 30 to 40 pounds per tree. I want to plant 200 more even tho I'm 70 years old.

A man from Reading writes—"The dozen one-year trees I got from you set in an open woodsy space all bore at three years, one bore 1 quart. I thought it would break itself down. At four years they all bore, this one bearing 1½ qts. I want to plant 50 acres as soon as the war is over."

Yes—sorry, sorry nothing larger—can't get them grown till they're sold.

	Each	Doz.	Hundred
1 year - 8—12 inches.....	\$.40	\$ 4.00	\$ 31.00
2 year - 12—15 inches.....	.60	6.00	50.00
3 year - due to the adverse season these didn't make such a tall growth but are good strong plants.			
1—2 feet.....	1.00	10.00	80.00
2—3 feet.....	1.50	15.00	

PLANTING SUGGESTIONS—Walnut-Chestnuts

I suggest you start out with a planting of walnut 60 x 60 ft. this makes 12 per acre. Then set a chestnut in each center of each square of walnut making 12 chestnuts per acre. This gives you a nice balance in space and soil use for the walnut is tall and deep rooted and the chestnut is more shallow rooted with a lower head.

Filbert Seedlings

(Plant two for Pollination)

No layered plants available.

Select seedlings that bear as good as the layered plants.

Bears 3-5 years.

	Each	Dozen
1—2 feet.....	\$.25	\$ 2.50
2—3 feet.....	.50	5.00
3—4 feet.....	1.00	10.00

Grafted SHAGBARKS—Sold Out!

PECANS—Sold Out!

HICANS—Sold Out!

Write for specimen list.

Fairbanks, Hybrid Shagbark X Hickory

A Hickoria cross

Bears 5-6 years.

	Each
2—3 feet.....	\$3.25
3—4 feet.....	3.50

Honey Locust (Thornless) (My Introduction)

Gleditsia triacanthos inermis Sweet pods for cattle feed.

Bears 3-5 years

Will grow 5 tons of fodder containing 1½ tons of cane sugar per acre. These large pithy pods run to 33% sugar 13% protein and more startling, nearly a 1000 units of Vitamines B₂ and some B₁. Famous for growth value.

For the city farm owner wishing to make the most out of his land with the least care here's your tree. I've set them on the worn-outest land in Tenn. and they grew and thrived. Set your pasture with these upper story forage producers.

We have one tree planted either 1937 or '38. YOU know the dry years we've had. The year it was planted—a 10 ft. tree about June 1st—it didn't rain all summer. In spite of its size it lived, it grew, it bore and bore more. 1944 we gathered 125 lbs. till the snows came, with probably 3 bus. still clinging to the tree. Twice a day my draft horse gets the ration of a handful of these delicious cookies (pods) and two Irish ears of corn (Nubbins'). He's fat and sleek. Saved bran for 13 to 15 weeks. You can do the same with a large herd of these trees also.

The small root system will make it easy for you and the Mrs. to put in a lot of them in one day.

Wm. Penn Oaks (*My Introduction*)
Quercus Alba *Q. Macrocarpa*

White

Burr or mossy cup

History of These Oaks

First selection, a survey was made of the Wm. Penn white oaks within 40 miles of Downingtown, our countryside is full of them. Selection was made on—

Nicest timber type tree—the best flavored acorn, fewest worms in acorns, heavy bearing.

Step two—Rapidly of growth of seedlings in seed beds—in 2 year seedlings, from one parent made 4-6 inch growth, from another 12 to 14 inches in growth. We've now discarded ALL but the best seed parents.

These are the "corn fields of the future." When man grows up to use what he has, he'll **Oak** a mountain ridge, a hill-side, a rocky knoll.

According to production figures of bearing oaks a low of 274 bus. of corn per acre in hog food value can be grown on mts. and steep slopes. You can start YOUR future tax reduction by planting NOW?

Many people insist on a black or red oak. THE WHITE is JUST as beautiful as either in the autumn with the addition of—the BEST oak timber and the BEST acorn for feeding.

THE BURR stands out as a brunette in the landscape, dark, heavy large leaved, deep green foliage. Another attraction is their remarkably rapid growth AND corky bark on branches. Timber good, acorns large and sweet.

Wax dipped special-grown for making fine roots.

Two years and over.

Burr only.

PLANTING FOR FUTURE WILD-LIFE 10¢

Plants for Wildlife Feeding

How to Plant a Border for Best Results in Bird Feeding

Blue print for border, \$1.00.

The ultimate effect will be an ornamental bank nearly all year—a solid hawk screen where birds can feed in safety and scoot to cover among the low bushes if attacked by predatory birds.

WILD LIFE

Many people wish to plant a few. To be of service to all we've made the following schedule when less than a hundred is ordered.

1 to 24, double the hundred rate.
25 at the hundred rate.
300 at the thousand rate.
For large mass planting, special rates.

And remember for parcel post orders up to \$5.00, add 10% postage.

The market on this stock is erratic. We're offering what we have in stock. Then if stock is unavailable or too high, won't book any more orders.
